

The Sparkle Fairy

Professional Mobile Dental Hygiene Services

Manager Information Pack

About The Sparkle Fairy

The Sparkle Fairy provides professional on-site dental hygiene treatment directly to care home residents across Staffordshire, Derbyshire, Leicestershire and Nottinghamshire. We are GDC registered, CQC registered, fully insured and DBS checked.

Rather than arranging difficult and often distressing journeys to external dental practices, we come to your residents — in their own familiar environment, at their own pace, with no transport required.

How It Works

01

Get in touch

Call or email us to check availability and discuss your home's needs.

02

Choose a date

We'll propose available dates and send you a booking confirmation.

03

Circulate to residents

We provide a simple resident interest form you can display or distribute.

04

We come to you

On the day, we set up in a room you provide and see residents back-to-back.

05

You receive a summary

We provide clinical notes and flag anything that may need a dentist's attention.

06

Book the next visit

Most homes book quarterly or bi-annually to maintain continuity of care.

Transparent Pricing

| Residents Seen | Price Per Resident |
|---------------------|-------------------------|
| 1 or 2 residents | £80 per resident |
| 3 or more residents | £50 per resident |

Each appointment is approximately 30 minutes per resident. No hidden costs, no travel charges, and no minimum contract. Most homes find that once residents and families hear about the service, demand quickly reaches the 3+ threshold.

On the Day

What we need from you

- ✓ Parking close to the entrance if possible
- ✓ A private room or quiet space
- ✓ A nominated staff member as point of contact
- ✓ Escort residents to and from their appointment

What we bring

- ✓ Portable reclining dental chair and unit
- ✓ All clinical instruments and materials
- ✓ Personalised oral hygiene advice tailored for each resident
- ✓ Award nominated hygienist care

Experience with Complex Needs

We have extensive experience working with residents who have conditions that make traditional dental visits difficult or impossible:

- ✓ Dementia and Alzheimer's disease — gentle, adapted techniques in familiar surroundings
- ✓ Limited mobility or wheelchair dependence — treatment in the resident's own chair or bed if needed
- ✓ Dysphagia or dry mouth — trained to recognise and adapt our approach
- ✓ High anxiety or sensory sensitivity — unhurried, compassionate approach
